#### Adding a Wholesale Book during Buyback

A title without a current wholesale value may still be available to buy wholesale for MBS. These titles require verification with MBS Inventory Control to ensure a need can be established for the title. This step is required as only a very small amount of these titles can be purchased. Therefore, they do not default with a guide price.

An example of a title that is not being bought but may have buyback value is below.

Book Information           Author         STEWART         Title         CALCULUS, EARLY TRANSCENDENTALS         Imprint         B/C           Publisher         CENGAGE L         Imprint         B/C         Imprint         B/C           Edition         8TH 16         Cover         Cover         Imprint         B/C         Imprint         B/C           New         300.00         Used         225.00         Imprint         B/C           MBS Special Notes         CLN-COMP         Transaction#         4           Store Special Notes         CLN-COMP         Transaction#         4           Store Special Notes         CLEAN WITH ALL PAGES INTACTI         Eugenetities         Eugenetities           Mess         CLEAN WITH ALL PAGES INTACTI         Eugenetities         Eugenetities         Eugenetities           New Books         0.00         Speculative         0         0         0         Pay         0.00         Used           Wholesale         10.00         Wholesale         0	Buyback > Enter Buybac	k Transactions

The following elements should be checked regarding a title prior to contacting Inventory Control:

- Activity # In the above example, the Activity # is 5. An activity number will often display between one and nine with 1 being lowest and 9 being highest. Books between 4 and 7 may have value even if they are not reporting a price. Typically books below 4 would not be bought and books over 7 should always display a wholesale price.
- Book Notes Sometimes a note or message will display (MBS Special Notes field and Messages field) that provide a note regarding this type of book. These include things such as CLN + COMP above (Clean and complete – no missing pages), Edition Status (e.g. OE for Old Edition), and other notes or messages dictating why a book may not be able to be purchased.
- Has the book been bought wholesale previously? If it has been bought at other stores (or if it was being bought one day but not the next) it may still have demand.

• **Book Edition** – Is this a current edition? If so, there may be demand. This is especially true if paired with a middle level activity #.

Provide the list of ISBN's that meet the criteria of possibly having a wholesale availability to Inventory Control. They will verify if the book can be bought, how many quantities can be bought, and the dollar amount.

The following steps review how to enter the allowed quantities and dollar amounts into ARC Buyback.

#### Steps for Adding a Wholesale Book to Buy

1. Navigate to Buyback > Maintain Buyback. The Maintain Buyback screen displays in the following screen.

ral Buyback Info	Additional Buyback Options
Store 1 University Store	Define Buyback Options
Change Store	Manage Buyback
MBS Data Base Effective Date 03/24/17	Dollar Analysis Display
MBS Data Base Expiration Date 04/21/17	Buyback Reporting
The prices in the MBS Database are effective	Cash Reconciliation
ark Details	Print Barcodes
	Update inSite Data
itores 1	Submit Rental Return
Terms	
Check for Outstanding Rentals at Buyback	
Now Pontal Poturos at Buyback	

2. Navigate to the Additional Buyback Options and select **Manage Buyback.** A table displays verifying the buyback is open and if any terms are initialized for retail.

yback > Maint	ain Buyback				
he store	1 entry is to initialize guide prices				
Buyback	Status Wholesale Buyback				
				<b>V</b> A	
Term	Store	Status	Initialized	Books	Options 🚌
Gd	1 University Store		0/00/00	No	Select
					Refresh
					Select All
					Unselect All
					Work with Books
					Complete Buyback
					Select/Edit Books
					Initialize Selected
					Post Selected Terms

Note that in the above example, no terms are set up for retail. If they were, the retail term will display. Regardless, the steps for adding a wholesale title do not change if a retail term is active for buying.

3. Click **Work with Books** from the Options list. Nothing needs to be selected to use this option.

Complete the information as follows:

• **New Guide Price** – Enter the price that MBS will pay for the title as confirmed by Inventory Control.

- **Expiration Date** Enter the date that the title will no longer receive the entered Guide Price.
- Limit Quantity Enter the approved number of units for the title that can be purchased as confirmed by Inventory Control.
- Use Price on Guide Shipment? Yes will ensure the price provided by Inventory Control does display on guide shipments.
- Price Application Choice:
  - **Apply only to this Buyback** Only allows the title to be purchased at the entered price for the store buyback
  - **Apply to all currently open buybacks** Applies the price to all stores within the company that are open for buyback so the book can be bought at other store locations (multi-store companies).
  - **Apply to all buybacks until expired –** Applies the price to all stores with an open buyback until the entered expiration date.
- 6. Verify the entry and selections and click Save. The screen will display with a confirm message to ensure the entered price is correct. Edit or click Save.
